WHY

implement a 3Shape A-scanner into your hearing care practice

3Shape Audio strives for the perfect custom fit to enable the end-users to harvest all the benefits of their selected product. To achieve this, 3Shape Audio offers the most accurate 3D impression scanners with the fastest binaural scanning to bring all details from the ear impression into the digital world to model the perfect fit.

Opportunities in implementing a 3Shape A-scanner into a hearing care practice include:

Get a tailored offer audio.3Shape.com/webshop

Enable the perfect fit

Get the best possible quality scans and reduce remake rates by capturing true surface textures and colors of the impression. The scanner automatically detects the impression color to ensure the best possible scan quality.

Give your end-users a great experience

Engage your end-users by scanning during consultation to visualize the perfect solution for their ear. Evaluate impression quality together or scan their existing custom product to recreate the fit they love.

Cut lead time with up to 33%

Don't waste time shipping physical impressions for custom earpieces and shells. Easy and swift impression scan-sharing gives you predictable and faster scheduling for revisits, and happier customers.

We are with you all the way

Get started quickly with easy scanning, maintain scan quality over time with included calibration object and future software updates, with support at hand if and when you need it.
